THE results of our last sale were extremely gratifying. They prove that our respect for and confidence in the Silver Dollars of Latin America and in the Early Decimal Coins of Mexico are completely justified. While the common coins of the various series will be establishing a firmer and somewhat higher base, the scarce issues and the rarities will need a longer period of ever increasing prices to attain a level commensurate with their values in our numismatic world.

This sale presents a small, but attractive, series of Ancient Coins, an interesting group of Spanish American and Mexican issues, a group of Philippine countermarked dollars, some of which are struck on very scarce coins, plus a choice selection of Swiss Talers, modern British Proof sets, United States Proof coins and a few Commemorative Half Dollars.

In the early stages of preparation is a master sale catalog of the coins of Mexico's Revolutionary Decade – 1910–1920. The cataloguer plans to revise completely the Howland Wood and the Sanchez Garza reference catalogs. With each piece illustrated wherever possible, this sale catalog also will list known coins not being offered in order that the final result will be a new standard for the series. If you have any piece or any variety not listed in Howland Wood or Sanchez Garza, please send it to me so that I may record it. Each such piece will be returned within a reasonable length of time or it may be consigned to the auction sale if you so desire.

When finally ready, the catalog will be sent only to our annual subscribers. For all others the price will be $5.00, so you might as well be an annual subscriber.

As always, attractive groups of coins from any series will be welcome as consignments for future auctions.

— NOTICE —

While there has been no special publicity until now, collectors of any and all Latin American coinage should know that there has been added to the awards given at the annual convention of the American Numismatic Association a special award for the best exhibit of Latin American coins. This award, donated by the cataloguer, will continue to be given at each annual convention of the A. N. A. Obviously, the winner of this award will also be a contender for the "Best in Show" award.

If a special group of your coins merits consideration as an exhibit, write to Mr. James Kirkwood (the well known paper money collector) or to Mr. Donald Decker, both at Box 735, Cleveland, Ohio 44122, in order to reserve exhibit space and to receive details about exhibit cases, etc.

Let us prove to everyone that the Latin American coinages challenge all others in interest and variety.

HOW AN AUCTION SALE WORKS

Perhaps you have wondered just how my auction sales of coins really work. If you have, this is what happens.

A large collection or a group of small collections are consigned by their owners to be sold at the best prices possible. Then the coins are assembled in a reasonable order, making lots of one or more coins, as I determine the buyer will prefer. The lots are then catalogued and described, sensible valuations are established and photographs are made for some of the outstanding pieces and those which are impossible to describe satisfactorily with words alone. When mounted, the photographs are sent to the photo-engraver for the preparation of plates to be used by the printer. Several thousand catalogs are printed and mailed to prospective buyers. Each catalog has a BID SHEET for the buyer to use, along with a return envelope.

When the BID SHEETS are received they are numbered in the order of their receipt and the bids posted in a master BID BOOK. On the date of the sale, the BID BOOK is checked and the high bidder on each lot has his bid – **starting at a normal advance over the second high bid** – offered against the floor bidders at the public sale. In a case where equal bids are received, the first bidder wins the lot. Therefore it follows that a mail bidder will receive the lot if a floor bidder does not exceed his bid by the normal advance.

Valuations are estimates of the value of each lot. They are sometimes less than catalog values because of condition. Often they are the standard catalog. Frequently they are higher or much higher than catalog values because current markets for these particular pieces far exceed the values given in available reference works.

A final word – the offering of ridiculously low bids that are only 10% to 20% of the estimate of value is a waste of my time and the bidder's time. They can only result in no more catalogs being sent to such individuals. Life is too short to bother with this type.

Govern yourself accordingly, and do enjoy this great hobby.
